ABSTRACT

The implementation tasks listed in this guide are those considered important for a smooth operation of the Fort Lincoln Elementary School. To accomplish these tasks, some models or suggested procedures have been devised. The models and procedures are contained in several different volumes on Fort Lincoln. A complete list of all Fort Lincoln documents is located in this volume. Summarized are implementation tasks, equipment and supplies, budget and purchase lists, book lists and testing. (For related documents see ED 047 171 through ED 047 188.) (Author/ON)

INTRODUCTION

INTRODUCTION

Prior to the opening of Fort Lincoln Elementary School, a number of tasks will be completed by the Staff Development Coordinator and others involved in preparation for Phase I. The tasks listed on the following pages are those considered to be important for smooth operation of the school. However, not all of the tasks are essential, and staff members may wish to redefine or eliminate some tasks.

To accomplish these tasks, some models or suggested procedures have been devised. The models and procedures are contained in several different volumes on Fort Lincoln. A complete list of all Fort Lincoln documents is located in this volume. Some tables of contents from these reports are included.

In preparation for Phase I, staff members will need to know first what remains to be done and where models or suggestions for accomplishing these tasks are located.

Remaining Planning Tasks*	Location of Tools Available for Task Completion
<u>Related to Objectives</u>	
Review and revise all objectives.	<u>Objectives for Fort Lincoln Elementary School</u>
Prepare intermediate objectives for health and physical education.	<u>Objectives for Fort Lincoln Elementary School</u>
Assign levels of proficiency to objectives which specify measurable behaviors. Define "how well" a student should perform on an objective.	See communications skills, objective #2 as an example in <u>Objectives for Fort Lincoln Elementary School</u> .
<u>Related to Testing</u>	
Prepare criterion test items for measuring progress on objectives.	<u>Guide to Implementation</u> section on Testing
Develop tests for student assessment of progress on objectives.	<u>Guide to Implementation</u> , Testing section contains models, procedures, and tests recommended for use.
Administer diagnostic tests to future students.	<u>Guide to Implementation</u> , section on Testing.
<u>Relating to Equipment and Facilities</u>	
Review recommended lists of equipment, supplies, books, tests and prepare final order for opening of school.	Equipment List and Book List contained here in Equipment, Supplies, and Budget Section. See also Midterm Report, Volume I, Section 1.5, Selection of Materials.
Organize storage of equipment and prepare physical environment for school opening.	Midterm Report, Volume II, Section Three dimensional floor plan
<u>Relating to Administration and Scheduling</u>	
Plan procedures for checking attendance, buying lunch, obtaining parental permission for trips.	

* Staff training activities are contained in Midterm Report, Volume II, Section 2.8.1.3.

Location of Tools Available
for Task Completion

Relating to Administration and Scheduling cont.

Select and revise and duplicate forms; prepare blank student folders.

Sample Forms. Midterm Report, Volume I, Appendix I.
Summary of Forms and Procedures, Midterm Report, Volume I, Section 1.11.1.

Schedule teacher time.

Midterm Report, Volume II, Section

Plan and schedule activities for the opening days of school.

Midterm Report, Volume I, Section 1.12, Suggestions for the Opening of School.

Relating to Community

Identify and become acquainted with human and material resources in the community.

Determine procedures for requesting, receiving, and evaluating volunteers.

Prepare Parents Handbook.

Outline contained in Midterm Report, Volume I, Appendix C.

Relating to Materials

Work individually with curriculum programs not familiar to teachers and paraprofessionals.

Descriptions Book and materials themselves.

Incorporate additional ideas, materials, and activities in the Activity Book.

Activity Book

Relating to Staff

Form task forces to complete jobs which need to be done before school opens, select team leaders.

Midterm Report, Volume II, Section 2.8.1.2.

Select stage representatives.

Midterm Report, Volume II, Section 2.3.1.1.

Prepare staff folders which will contain records and information relating to staff development.

Midterm Report, Volume II, Section 2.8.

Location of Tools Available
for Task Completion

Relating to Staff cont.

Develop a form or procedure for staff evaluation which will satisfy external demands of D. C. Public Schools.

Develop a procedure of staff evaluation which will allow parents, students, other staff members, and the teacher himself to assess his progress at Fort Lincoln.

Relating to Stage I

Stage I teachers will need to devise a system to keep a daily record of vocabulary development for each child.

Stage I placement summary sheet lists requirements for advancement to Stage II. Teachers might want to choose Discovery Objectives that reflect these requirements and check these as minimum required objectives. Transfer to "Basic Learning Skills Checklist" (see below).

Complete Basic Learning Skills Checklist. Indicate required skills. (see above).

See "Vocabulary Checklist," Volume I, Appendix I, Figure K.

Stage I Summary Placement Sheet, Mid-term Report, Volume I, Appendix I, Figure E-1.

Intermediate Discovery Objectives, Objectives Book.

Guidelines for selecting required objectives in Guide to Implementation.

Basic Learning Skills Checklist model, Midterm Report, Volume I, Appendix I, Figure J.

Guidelines for Basic Learning Skills checklist are contained in the Guide to Implementation.

REPORT #3
VOLUME I

APRIL 6, 1970

PREFACE

This report is a description of the OPEN PLAN for the Fort Lincoln New Town Education System. It describes the steps that must be taken between now and the opening of the First Facility as well as the processes involved in implementing and conducting the high quality education system mandated by the District of Columbia School System.

The OPEN PLAN actually consists of seven separate plans. They are described in three separate volumes:

- | | |
|-------------------|---------------------------------|
| <u>Volume I</u> | 1. Education Plan |
| <u>Volume II</u> | 2. Organization/Staffing Plan |
| | 3. Operations Plan |
| | 4. Community Participation Plan |
| <u>Volume III</u> | 5. Facilities Plan |
| | 6. Funding Plan |
| | 7. Implementation Plan |

GUIDE TO EQUIPMENT AND SUPPLIES BUDGET FOR EDUCATION PLAN

INTRODUCTION

This budget (see facing pages) is confined to equipment and supplies (classroom and office) for Stages I, II, and III-IV. The first six columns relate to Investment expenditures. The remaining columns relate to Operating expenditures.

The figures in the "budgeted" columns of the line marked "Stage I" (first horizontal line) are taken from the printout contained in the Funding Plan, Midterm Report, Volume III, Section 6, Appendix A.

The columns headed "allocated" contain the total costs for items recommended for purchase to prepare the school for opening. The columns headed "not allocated" contain the total amounts of money available to Ft. Lincoln staff for purchase of equipment and supplies during Phase I and/or throughout the school year.

Other cost categories contained in the operating budget as recorded in the Funding Plan printout which relate directly to the instructional program are listed below with the amount allocated for each stage. No money has been allocated from any of these categories.*

	Stage I	Stage II	Stage III-IV
<u>Category</u>			
Communications, Printing, Facilities			
Communications	750	750	750
Printing and Reproduction	750	750	750
Facility Rental	-	-	-
Travel			
In-town, Professional	40	60	80
In-town, Student	310	350	1,160
Out of town, Professional	590	890	1,180

* See Midterm Report, Volume III, pages 6-16 and 6-17 for a description of each category.

	Stage I	Stage II	Stages III-IV
Consultants and Contracts			
Consultants	2,310	2,310	2,310
Contracts	8,500	5,500	6,000

It is recommended that decisions affecting the expenditures of these funds be made by the staff of each stage during Phase I and/or school operation.

DEFINITION OF CATEGORIES

Audiovisual Equipment includes all electric or manual devices for presentation or manipulation: projectors, tape-recorders, typewriters, cameras, teaching machines, etc. For a detailed discussion of this category and an itemized list of recommended purchases see Exhibit A.

Audiovisual Software includes all materials which are presented or manipulated using the above devices. These materials are itemized under the headings shown in Exhibit B. Exhibit B also shows how the budgeted figures and dollar/student ratios for each stage were determined. See the Equipment List for an itemized list of recommended purchases.

Instructional Materials includes games, toys, puzzles, charts, self-instructional programs (including those designed for machine presentation), and other printed materials, except books. For convenience, materials are arranged according to subject area for all stages except Stage I. Exhibit C shows the allocated expenditures by subject area and by category (AV Software or Instructional Materials). See the Equipment List for specific items.

The varying dollar/student ratios among the stages are based on the assumption that younger students have a greater need for concrete, manipulative materials. As their ability to handle abstractions increases with age, experience, and learning, this need decreases. By Stage III and Stage IV, students are engaging in projects that require little commercial material or are working on activities requiring reference

to books and other nonconsumable information sources in the Resource Center, the school, and the community.

The items included under the heading Musical Instruments were taken from the minimum standard list in Equipment and Supplies, a catalogue of tested and approved materials for elementary school use published annually by the Association for Childhood Education International (ACEI). It represents the number of instruments required if 45 Stage I children participate simultaneously. In Stage II and Stage III-IV the number of children was raised to 65. See the Equipment List for specific items.

The instruments contained on the list are primarily rhythm instruments designed for use in groups. It is recommended that consideration be given to a program of instruction and performance on standard band and orchestra instruments as the specific interests of students are identified and financial and human resources to equip and staff such a program become available.

Arts and Crafts contain all reusable and consumable materials required for creative expression: paint, brushes, paper, scissors, paste, yarn, cloth, clay, etc. The itemized list is drawn from the minimum standard recommended by ACEI. Quantities recommended by ACEI are for 20 children in Stage I, 25 children in Stage II, and 30 children in Stage III-IV. The items included in the Equipment List are standard school supplies. Quantities required for Stage I were calculated and costed to obtain a "budgeted" figure. The resulting figure was approximately \$10/student. This figure was applied to the other stages, but exact costs were not calculated. The Equipment List contains only a minimum standard list of arts and crafts supplies recommended by ACEI.

Indoor/Outdoor Apparatus refers to the climbing structures, games, and

equipment that encourage large muscle activity. See the Equipment List for specific items.

The allotment for Tests will cover purchase of commercial tests for student use, system evaluation, and diagnosis. It may also be used for scoring services and for teacher development of tests related specifically to behavioral objectives, both terminal and intermediate.

The category designated Library has two subheadings. The subheading Books refers to books purchased for use in a particular stage. The subheading, Resource Center, indicates the portion allocated for the purchase of books, AV hardware and software, and graphics production equipment and material that would be selected, maintained, and distributed by the staff of the Resource Center according to policies planned in conjunction with representatives of each stage.

The amount allocated in this operating budget totals \$18,000. This should be adequate to stock the Resource Center with books to the minimum standards recommended by the American Library Association.* In future years this figure may be reduced as the Resource Center collection reaches and surpasses the standards for all media recommended in Standards for School Media Programs prepared by the American Association of Librarians and the Department of Audiovisual Instruction of the National Education Association.**

Exhibit D describes how the selection of books for stages and Resource Center has been coordinated. See the Book List for specific books.

Supplies is a special category established to assure that funds would be available to permit student purchase of materials. Students may spend their portion individually or may elect to pool their funds to buy an item selected by the group.

* Books for Elementary School Libraries, An Initial Collection. Compiled and edited by Elizabeth D. Hodges, Chicago: 1969.

** 1969. See especially pages 30-33 and 45-49.

Stationery and Office Equipment contains the items required for clerical and administrative activities in each stage. No attempt has been made to prepare a list of items recommended for purchase, but ACEI's minimum standard has been included in the Equipment List as a checklist.

A Surplus remained in each stage after all money for classroom supplies had been budgeted. This amount may be used in any classroom supply category at the discretion of the stage staff.

(Caution: Some upward adjustment in allocated amounts in all categories should be made to allow for price increases.)

Exhibit A

Description of
Audiovisual Hardware Equipment List

The attached list contains all items of audiovisual equipment that are recommended for purchase for the opening of the first facility at Fort Lincoln. It should not be construed as inclusive or final, but subject to additions and revisions as new data and experience indicate.

In all likelihood more pieces of certain types of equipment will be necessary, and some items recommended for purchase, but not listed here may be added either before school opens or during subsequent years of operation. These items are as follows:

- Single concept film loop viewer
- AM/FM radio
- Microprojector
- Microphone and amplifier
- Hand adding machine
- Still cameras
- Movie cameras

The models specified in column two are taken from recommendations for audiovisual equipment prepared by Grabowski Associates to meet these criteria:

- Durability
- Ease of operation
- Availability of service
- Not likely to be soon outmoded
- Operates satisfactorily without elaborate modification of classroom conditions

These recommendations should be used only as guidelines for final selection of equipment for purchase. Wherever possible the approximate price in parentheses follows each model name. The prices were taken from the 1969 Audio-Visual Equipment Directory.

The costs for AV equipment purchase have been assigned to the investment budget except where indicated. (see detailed budget sheets for total AV expenditures by stage).

Exhibit D

Description of the Book List

The booklist which follows contains current titles which as of 1969 are intended to provide a guide to ordering supplementary books for the Fort Lincoln School library.

The major source of recommendations for books to be purchased for the library is the guide prepared by the American Library Association. In annotated bibliography form, Books for Elementary School Libraries* lists approximately three thousand titles recommended for first year purchase to provide the backbone of an elementary school library. Complete ordering information is included in the guide. We recommend ordering all titles listed in the guide including those books appropriate for (U) upper grades (seventh and eighth grades).

Additional books for purchase are listed first for Stage I and then for Stages II, III, IV with sources footnoted. Related instructional objectives are indicated in the lefthand column either beside the subject heading or the individual title. (E. g. The book Magnets and How To Use Them is in the Stage I list under the heading "science" and the number 32.00 in the lefthand column "Obj." refers to the Discovery objective list in which objective 32.12.01 is: "Knows how a magnet works.")

Recommended number for purchase is one copy of each book. For a discussion of the money allocated for books, see the Fort Lincoln Budget discussion.

We strongly recommend that as books are ordered, received, and catalogued for use at Fort Lincoln, a master list of books be made so that each teacher can have a copy of this list for use in recording his comments about particular books. This list might be arranged by categories such as fiction, poetry, biography, etc.,

*Books for Elementary School Libraries, An Initial Collection. Compiled and edited by Elizabeth D. Hodges, Chicago: American Library Association, 1969.

and related objectives noted. Such individual lists also would serve as a starting point if teachers wished to relate objectives to reading materials.

Comments Which Apply Only to a Particular Stage

Stage I

All objectives refer to Discovery objectives unless otherwise noted. For those books listed both in Stage I and in the ALA guide, only the title is repeated. Where duplication occurs, two copies should be ordered: one copy for the Resource Center and one for Stage I.

An asterisk before a title indicates only that the book is listed under another subject matter area and ordering information has already been given. A second copy should not be ordered.

Stages II, III, IV

The symbol + indicates that the book has been ordered for Stage I and is listed again for purchase so that the second copy can be placed in the Resource Center.

Notations of sources indicate which entire lists of books are primarily related to Black culture and the mark ● denotes individual books relating to Black culture.

IMPORTANT: Several books which required description are listed in the teacher "Idea Book" along with xeroxed descriptions. These books should also be ordered for Fort Lincoln. See the "Idea Book" for ordering information.

DESCRIPTION OF THE EQUIPMENT LIST

This Equipment List has items listed according to the four Stages at Fort Lincoln. Under each Stage the items are categorized under headings as follows:

Instructional Materials

Audiovisual Software

Miscellaneous

Musical Instruments

Art and Craft Supplies (including paper; woodworking; and
sewing, knitting and weaving)

Within these broad categories, equipment is further denoted by subject area:

Discovery

Reading

Communication Skills

Math

Health

Science

Social Studies

Arts and Humanities

Miscellaneous

In addition to the sections listing equipment for each Stage, there are separate lists of:

Minimum Standard Indoor/Outdoor Apparatus and
Sports Equipment for Stages II, III and IV

Minimum Standard Art and Craft Supplies for
Stages III and IV

Minimum Standard Stationery Items for use in
Stages I, II, III, and IV

Items Recommended for Additional Purchase in
all subject areas

Supplies Available From Parents, Students, Teachers, and Other Sources

In the format used on this list, the Stage, category of equipment, and subject area appear at the top of each page. Beneath, each item is listed separately along with distributor, number recommended for purchase for use by the entire Stage, and unit cost.

One important aspect of this list is that each item is cross-indexed with specific learning objectives. The objective is listed in the left hand column marked "Obj." To match the equipment item to the objective listed refer to the Book of Objectives for Fort Lincoln.

At the back of this list is a complete list of Publishers, Distributors and Equipment Manufacturers which correlates with the distributor or abbreviation given under the Distributor column.

In some cases on this list the unit cost is followed by a double asterisk which indicates that a description of the item is available by referring to the Book of Descriptions.

Specific unit costs are omitted for most items of indoor/outdoor and sports equipment, art and craft supplies, musical instruments, and stationery. Cost figures were estimated for these items using the basic recommended items listed in two books.* For a complete discussion of the cost figures see the budget discussion in the "Guide to Implementation of the Fort Lincoln Elementary School Program" A separate list of standardized tests recommended for purchase is also given in the Guide.

*Nimnicht, G., McAfee, O., and Meier, J. The New Nursery School. New York: General Learning, 1968; and Equipment and Supplies. Bulletin 39. Washington Association for Childhood Education International, 1968.

Comments which apply only to a particular Stage.

Stage I Instructional materials are not categorized by subjects since there is overlap and most of these materials apply to several subject areas.

The objectives are all Discovery objectives unless otherwise noted.

Indoor/Outdoor Equipment and Sports Apparatus is listed here for Stage I.

Stage III,
IV Musical instruments are listed only for Stage III since both Stage III and IV will be housed together and share the use of instruments.

Art and Craft Materials for these two Stages are listed together for the same reason.

Criteria for selection of materials:

- o Has demonstrated its effectiveness
- o Is self-instructional, permitting self-pacing, immediate feedback, and self-evaluation
- o Will facilitate achievement of specific performance objectives
- o Is durable and safe
- o Provides alternative ways to achieve a specific objective (aurally, usually, kinesthetically, etc.)

Crepe paper	20" x 7 1/2' flameproof, assorted colors	3 pkgs.
Finger painting paper	16" x 22", 100 sheets to pkg.	4 pkgs.
Manila paper	12" x 15", 500 to pkg.	4 pkg.
Manila paper	18" x 24"	1 pkg.
Poster paper	18" x 24", 500 to pkg., assorted colors	1 pkg.
Tissue paper	White and assorted colors	3 pkgs.
Newsprint paper	18" x 24"	3 reams
Newsprint paper	Colored	2 reams
Paper wiping tissues for paint rags	5000 to pkg.	2 boxes
Wrapping paper	36" wide	1 roll

Stage II

Minimum Standard Art and Craft Supplies Woodworking

<u>Item</u>	<u>Specifications</u>	<u>No. Per 25 Students</u>
Alcohol		1 qt.
Beaver board, 2 pieces	4' x 12'	
Brace	Non-ratchet, and bits, various sizes, 1/4", 1/2", 3/4", 1"	1 ea.
Brads		1 box
Claw hammers	12, 13 oz. to 16 oz.	6
Dowel rods	Various sizes, 1/4", 1/2", 3/4", 1" to 2 1/2"	1 doz.
Enamel	Yellow, red, blue, violet, orange, black, green, brown, white	1 pt. ea.
Eye screws		1 box
Lumber	White pine, surfaced 4 sizes 1" x 4", 1/2" x 3", 1/2" x 1", 1" x 1" (for axles on vehicles); 1" x 4" (for bases on boats, cabins, etc.), in 4' and 6' lengths	
Molds	Wooden or button, 1", 1 1/2", 2 1/2" for wheels	1 ea.
Nail nipper	or 6" plier	
Nails	Finishing, 1 1/2"; with heads, 1 1/2", 2"; blue lath (fine shank head, 1" long); box, smooth wire, 1 1/2"; roofing, with large heads (to fasten wheels to axles)	several boxes
Paint, house	White, yellow, red, blue, black, green, violet, brown, orange (poster paint can be used)	1 pt. ea.
Paint remover		1 gal.
Rasps	Medium	2

Stage II

Yard goods	

Supplies Available From
Parents, Students, Teachers,
and Other Sources

Indoor/Outdoor Equipment

<u>Item</u>	<u>Specifications</u>
Bean bags	
Bubble solution	
Field packs	One or two obsolete U. S. Gov't. Surplus
Hose	Short pieces
Kegs	Two or three rolling, painted
Push-and-pull toys	
Rocking horses	One or two, spring action
Sand toys	Shovels, plastic containers, etc.
Sewer pipe	For tunnels
Stick horses	Several
Wooden boxes	Packing boxes: as support for balance and walking boards; could also use tires, cement blocks or low saw horses as supports

Supplies Available From
Parents, Students, Teachers,
and Other Sources

Arts and Crafts
Scrap and Inexpensive Materials*
All Stages

Many materials with exciting possibilities can be found that are not commonly thought of as art supplies. The listing here may bring to mind some of them which may have creative potentialities. They can be obtained easily. Look for them in the junkyard, basement, attic, garage, school shop, machine shop, radio shop, anywhere. Ask children to bring scrap materials from home and keep these in a number of special boxes in the storage closet. There are hundreds of ways of using these scraps and the usage should result in stimulation of the imagination. The teacher should remember that this listing is in no way a substitute for good art supplies but does extend the possibilities of such supplies.

TESTING

FORT LINCOLN TESTING PROGRAM

A wide variety of tests and testing procedures will be used at Fort Lincoln for a variety of purposes. Testing must be recognized as a useful learning experience that need not be threatening if used to assess needs and not to rate students. These tests detailed below may be described as diagnostic, assessment, placement or recreational (i. e. just for fun).

- Diagnostic tests are those tests administered in order to identify the cause of a specific problem. When teachers become aware of a learning difficulty they will want to investigate fully the nature of that difficulty through diagnostic measures. These tests also may be used at the beginning of the year for new students or for students whose records are missing or incomplete. Diagnostic tests may be used when a student and his teacher are reworking a long-term prescription which is no longer adequate nor realistic (see Midterm Report, Vol. I, Section 1.6.2).
- Assessment tests are those tests where items are keyed directly to corresponding objectives. The purpose of assessment testing is to monitor progress on specific objectives or to test for mastery of a specific objective. Assessment tests may be administered formally using various means. The sections that follow offer models using teacher made criterion test items and adapting standardized test items. Also listed in figure 1 are those programs recommended for use at Fort Lincoln which include assessment tests as part of the program. Assessment tests may be administered informally through observation,

self-evaluation, or group evaluation using discussions, and questioning while observing and recording feedback from students. Informal assessment is frequent in Stage I.

- Placement tests are used to determine if a student has mastered the skills prerequisite to entry into a sequence of instruction. Some programs recommended for use at Fort Lincoln contain placement tests or procedures (see fig. 1). These instruments may also be used for determining readiness for an experience. (e.g. Metropolitan Readiness Test).
- Recreational tests are those tests which students take for fun (e.g. to see if they have a skill or to acquire proficiency in test taking). The philosophy of Fort Lincoln assumes that test taking is a learning situation which will not be treated by students or teachers as a measurement of ability. Tests which are not keyed to objectives or are not suitable for the testing program will be used for this purpose. Rules governing the use of some Standardized tests prohibit use of individual items but the tests can be used as models from which teachers or students will develop similar tests (see model). All types of tests including achievement, intelligence, and diagnostic tests provide useable items. Teachers may wish to eliminate choice from some multiple-choice tests to make these practice situations more challenging.

Testing will occur frequently at Fort Lincoln, but it is a less formal and more routine part of the weekly program. Most paper and pencil tests will be short and like a quiz in nature requiring a few minutes of the student's time. A majority of tests are

pre or post tests administered at the beginning or end of a unit so that students will avoid "relearning" something they already know and will have immediate feedback concerning their own progress.

What follows here are either tests recommended for purchase at Fort Lincoln or models for development of teacher made tests. A description of a device suggested for scoring tests will be found at the end of this section.

Preparing Criterion Test Items

Criterion test items are those evaluative measures designed to test the level of achievement on a given objective. In most cases the testing procedure and content are both stated in the objective itself. However, a great deal of variety can be built into the criterion tests, so that work on a single objective may be evaluated in a number of ways.

The process for writing criterion test items begins with the objective. Every objective specifies the content (skill, knowledge, value, or attitude) that the student must acquire. It indicates how the content is going to be demonstrated behaviorally so that it can be observed and measured. Most objectives specify the conditions* (from memory, using a ruler, etc.) under which the student will perform as well as the degree of accuracy** at which he must perform. Accuracy, especially in the affective domain is not always measurable. The following terminal objective taken from Objectives for Fort Lincoln Elementary School, will be examined and a test item prepared.

→ On an unlabelled map or globe, identifies types of land forms and bodies of water. ←

The content of the objective is land forms and bodies of water, the behavior is identifies, the condition is on an unlabelled map or globe. The teacher (or pupil for optional objectives) is free to assign the degree of accuracy necessary on the test she devises. Some sample tests follow:

*In many instances, Fort Lincoln objectives do not define the specific conditions, so that teachers will have more flexibility in using the objectives.

**Fort Lincoln teachers will determine the degrees of accuracy they feel appropriate for all objectives.

Test 1: On an outline map of the Western Hemisphere, locate and label at least 8 of the following 10 land forms and bodies of water.

ocean	plateau
isthmus	mountain
peninsula	plains
delta	cape
island	gulf

Work by yourself.

Test 2: Take the unlabelled map of the North American continent and find as many examples as possible of the following land and water forms: Color the land and water forms that you find using the colors listed below. There are at least twenty-five. See if you can find twenty. For example, color the islands red.

islands	red
mountains	purple
rivers	black
plateaus	yellow
lakes	blue
peninsulas	green
deserts	brown
plains	orange
bays	lavendar
oceans	gray

Test 3: Using plaster of paris construct a relief map of an imaginary country. Label all the land and water forms you build. Ask for help if you need it.

These three tests measure competency on the same objective. All objectives can be treated in a similar, flexible fashion. Using an objective from the affective domain, more examples of tests follow.

Respects the integrity and the dignity of other individuals
(Social Studies #2)

Test 1: Teachers and pupils will fill out the following checklist every 8 weeks and then compare notes.

Check the items which are true of _____ (Student's Name)		TRUE
1.	Does not bully or tease other children	
2.	Practices common courtesies such as waiting in line without pushing	
3.	Praises or comments in a mannerly way on the achievements of other classmates	
4.	Refrains from name calling	
5.	Demonstrates appropriate behavior in places such as museums, park, movies, church, ball park	

Test 2: The students will be assigned parts which they will act out or role play in short sketches. At the conclusion of each sketch students will discuss their reactions to the roles. They will identify incidents of conflict where the rights of individuals were not respected.

Role playing situations:

- A sixth grader wants to swing. Second graders are using the swings.
- A student is called to the principal's office for breaking a school rule.

- Several children want to watch different T.V. programs.

Father is present and has his choice too.

A final example is taken from the Arts and Humanities.

Given a collection of works in the same medium, selects one to write about or discuss in terms of his reaction to it, the artist, the form, the historical period in which it was done, or a topic of his choice. (Arts #4)

- Test 1: After visits to galleries, the student will select a medium (clay, wood, oils, water colors) and one work in the medium then produce a written report covering areas defined in objective four.
- Test 2: A group of students will select a medium. Each student will select one work in that medium. The group will then organize and present a panel discussion for other students and teachers.
- Test 3: From a collection of classmates' works, a student will select one piece to discuss. He will write from the viewpoint of a contemporary art critic.

It would be possible to continue indefinitely, but these few examples should serve as an adequate model. The guidelines are these:

- The test must reflect the behavior specified in the objective
- The test must show the criteria on which the work is being evaluated.
- Tests should be as varied and interesting as any other daily learning experience

Using Standardized Tests

One alternative to writing test items for every objective is to adapt standardized tests to match objectives. A teacher can take any standardized test, and label each item or group of items with the appropriate objective.

There are at least two ways in which the teacher might use this system. One, any test which has the items labelled with objectives can be administered as a whole. The teacher, in scoring the test, knows which objectives the student is progressing in and which objectives need additional work. An example of this procedure using the SRA Achievement Series follows.

Two, it is possible to match like items on several tests and to collect a vast reserve of test items appropriate to each objective. For example, all reading tests check students' factual and literal comprehension of sentences and paragraphs. Teachers may collect all these items at various grade levels and develop an entire test sequence for literal comprehension.

Like all routine testing procedures, the administration of standardized tests is for diagnostic and assessment purposes. A school evaluation occasionally may require the use of a norm reference test.

COMBAT — A Source of Assessment Test Items

The Portland, Oregon, Public School* system is building extensive test item files, to be matched to relevant objectives, for incorporation into a program of computer assisted test construction which the Metropolitan Area Testing Program is developing. This program is known by the acronym COMBAT (Computer Based Achievement Testing). COMBAT is a system which permits a teacher to describe an instructional test needed for student assessment at a specific moment. She can describe this test either in terms of the behavioral objectives on which it should focus or in terms of the topical contents desired. The computer then selects, from the files, a sampling of items that fit her blueprint. These can be delivered for preliminary inspection, or can emerge in the form of ditto masters ready for use. The system is presently expanding operations to include more subject matter areas and test items. At the moment it takes a teacher a five minute phone call and a two day wait for the mail to bring her a test.

The Portland Schools will trade test items with other school systems. Developers hope to collect one hundred thousand items at all grade levels to make the system effective.

*Portland Public Schools (Testing Service), 220 Northeast Beech Street, Portland, Oregon 97212

Boehm Test of Basic Concepts

The Boehm Test is recommended by the Psychological Corporation for use with kindergarten, first, and second graders. The instrument tests a student's aural comprehension of relatively abstract concepts found by developers to be frequently used during the early years of learning. It is not intended to be an intelligence or readiness test. Rather, it will provide Stage I and II teachers with additional information on concept development and will indicate which students need special help with these words.

The test takes less than an hour, can be administered to groups, and contains about fifty items represented pictorially. Students respond by marking the correct picture. Additional information follows.

BOEHM

Ann E. Boehm

TEST of basic concepts

This pamphlet is a reprint of the section of the Manual pertaining to the administration of Form A of the *Boehm Test of Basic Concepts*. Information on scoring is provided in the complete Manual and also on the Class Record Form. Copies of this pamphlet are supplied upon request in sufficient quantity so that each test administrator can have one.

HOW TO ADMINISTER THE TEST

Administering the *Boehm Test of Basic Concepts* is simple and straightforward. The instrument consists of 50 pictorial items arranged in approximate order of increasing difficulty and divided evenly between two booklets, each containing 3 sample questions followed by 25 test questions. Booklet 2 is more difficult than Booklet 1. Each item consists of a set of pictures, about which statements are read aloud to the children by the examiner. The statements briefly describe the pictures and instruct the children to mark the one that illustrates the concept being tested.

Each of the booklets requires approximately 15 to 20 minutes to administer to kindergarten classes. This time estimate includes the time needed for giving general instructions and reviewing the sample questions. Older groups should require somewhat less time than younger classes.

Experience with the tryout and standardization groups has indicated that most children become interested in the test and enjoy taking it, so that holding the children's attention, even at the kindergarten level, is usually not difficult. Both booklets may be administered at a single session if the children remain attentive. However, there is considerable advantage in administering the *BTBC* in two separate sessions if the children are very young or

lack the attention span required to respond alertly to all 50 items of the test at a single sitting. *This decision should be made before starting the second booklet, since a booklet once begun should be completed in the same session.* A booklet should not be split between two sessions.

If very young children who are unfamiliar with handling and marking workbooks are being tested, small groups of 8 to 12 children are generally advisable. When large groups are being tested, it is helpful to have teachers' aides or proctors assist the children to write their names, check responses to the sample questions, turn pages and find their place, and so forth. (Alternatively, the teacher may wish to write the children's names on the booklets in advance and make a corresponding adjustment in the directions given to the children.)

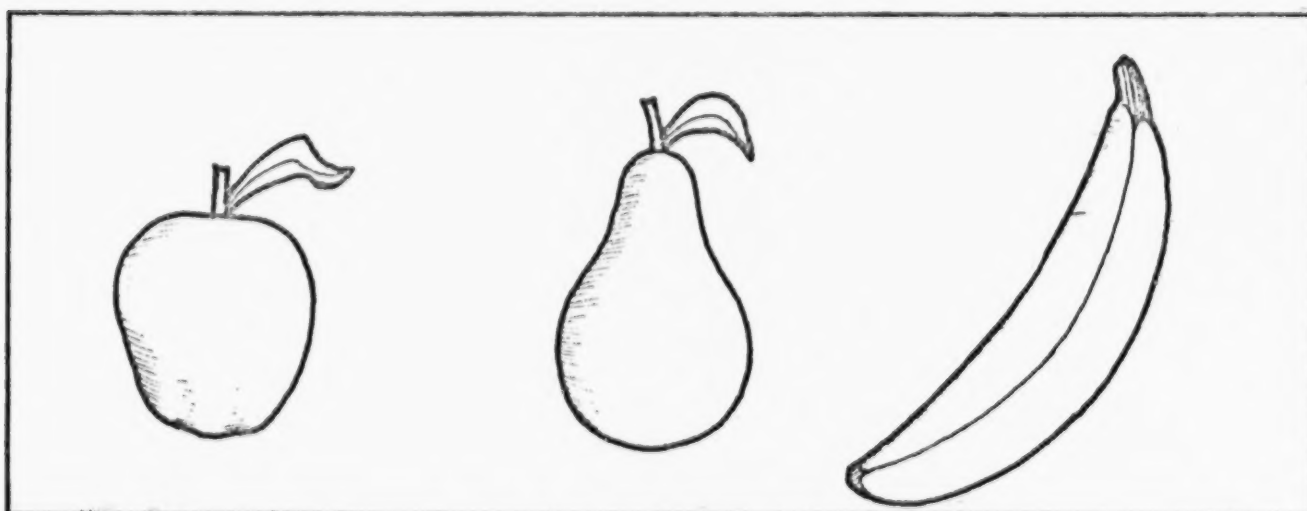

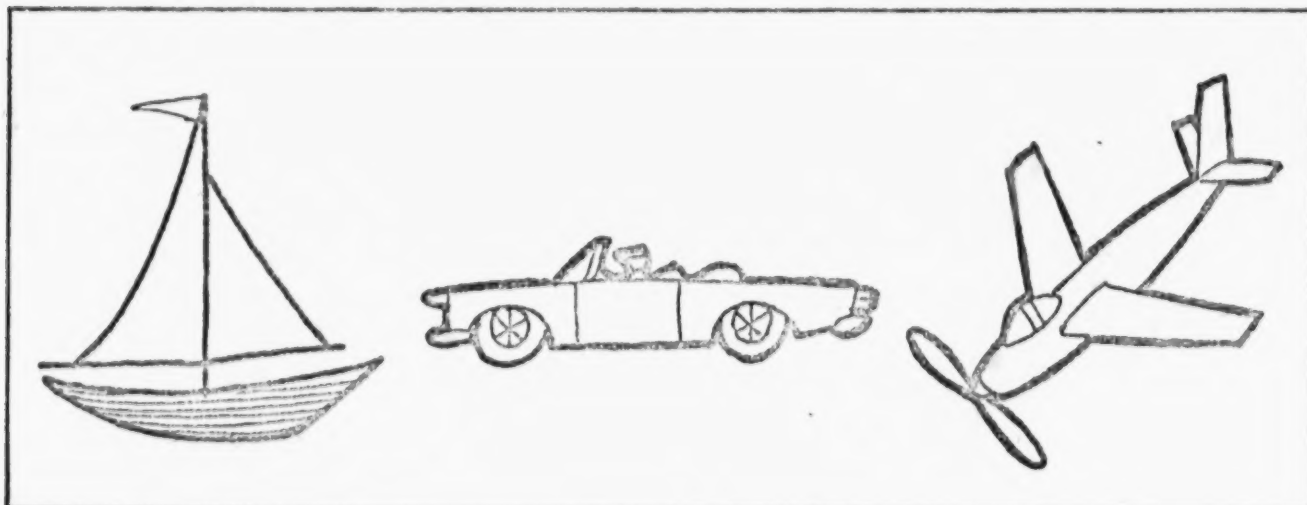

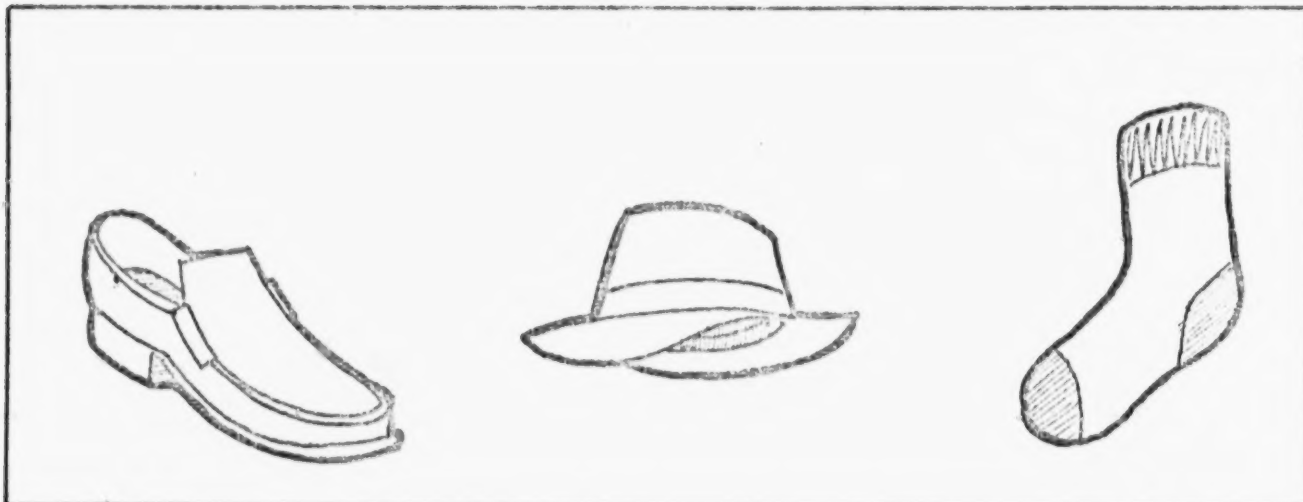

The testing materials consist of (a) the Manual and a demonstration copy of each test booklet for the teacher, and (b) two test booklets plus a crayon or pencil for each child.

Before beginning the test, seat the children as far apart as possible, and give each pupil a pencil or crayon. Using the demonstration booklet, begin with the 3 sample questions. When these have been completed, check each child's responses and have him correct any errors before proceeding to the test questions.

Test Scoring Machines

Since testing will be an integral part of the learning system at Fort Lincoln and test grading is frequently a bane to teachers, we have investigated ways of simplifying the test grading process. In evaluating the various test scoring machines we have used the following criteria:

- low cost for both hardware and software
- flexibility in use and easy maintenance
- allows teachers to develop their own tests
- can be scored by others besides teacher
- provides individual wrong answers, not just a score of percentage of correct answers for test

The best single test scoring system which meets all of these criteria is the Quick Response System (QRS).

Both QRS hardware and software are inexpensive enough that for less than three hundred dollars (\$300) materials could be purchased so that thirty students could take tests simultaneously. With other systems the cost of the hardware (one machine) alone may be nearly \$1,000.

The QRS equipment consists of individual boxes made so that the student records his answers on cards using a stylus to punch the correct answer. Compact and durable, repairs can be made by teachers and since no individual component costs over ten dollars, the worry over loss is lessened.

A Teachers' Manual is available showing various methods for equipment use and ways for teachers to develop tests. One method particularly applicable to Fort Lincoln is the use of "Color Coded Instruction" to develop pre tests

keyed to existing texts and materials. (This method is described on pages 28-29 of the attached Teachers' Manual.)

Tests can be scored by students, aides, and teachers after they learn the scoring process. Individual wrong answers are recorded and the scorer must compute the right answer percentage or note the number of correct answers. Scoring involves practice in manual activity and a certain amount of arithmetic. Permanent answer cards can be made to simplify the scoring process.

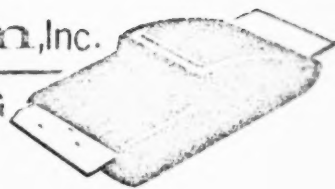

The device can be used for printed tests and tests presented by other means such as a test put on a slide projector or a cassette recorder.

Descriptive information and the Teachers' Manual are attached. More information is available from Quick Response System, Box 90, Falls Church, Virginia 22046.

QRS

Quick Response System, Inc.

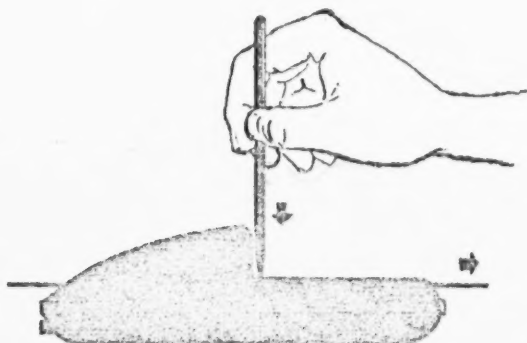

EASY, ACCURATE OBJECTIVE TESTING

SPARKS STUDENT INTEREST

Testing becomes a learning experience. Instant scoring enables the student to learn from his mistakes, correct them while his interest is still high.

EASY TESTING

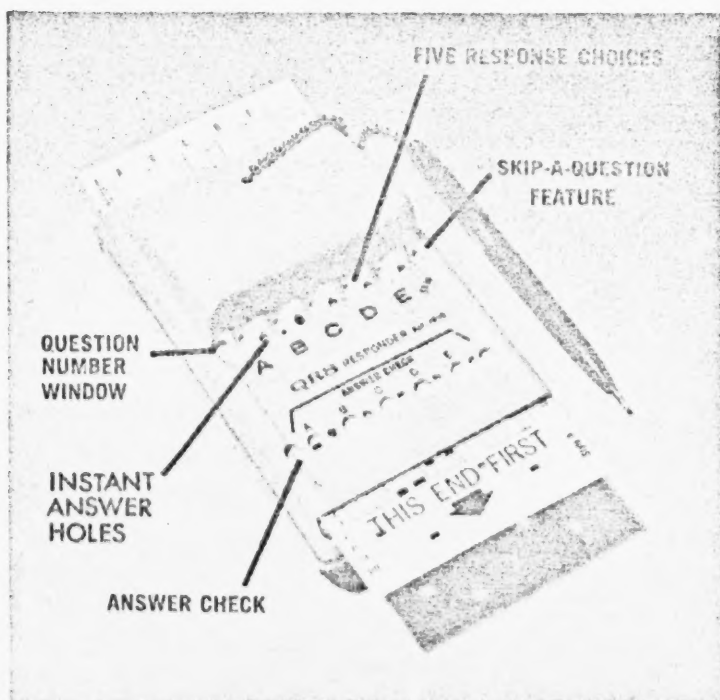

THE QRS RESPONDER BOX is designed to make testing easy and accurate. Students can answer only one question at a time. As each question is answered, the test card automatically advances to the next question.

SKIP-A-QUESTION feature allows the student to by-pass a difficult question and come back to it later.

ANSWER CHECK line aids the student in reviewing his answers before turning in his test card.

A student may change his answer by circling the wrong response and punching a new choice.

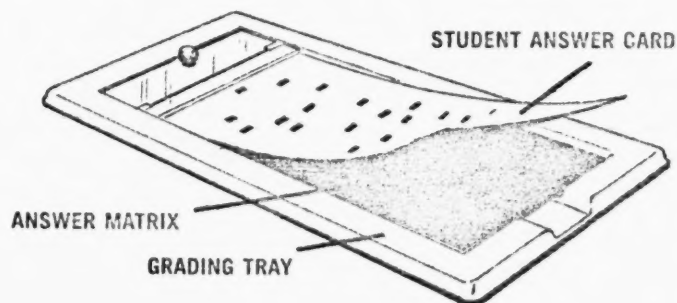

QRS is "cheat resistant." Students cannot read another's response card and cannot change an answer without identifying the change.

SAVES TEACHER'S TIME

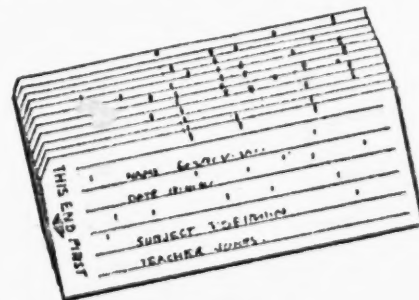

Tests are graded in class. Instant scoring eliminates this "homework" for teachers, providing additional time for teaching or class preparation.

INSTANT SCORING of student Response Cards saves time. It takes less than ten seconds to score a test. Less than five minutes to score 30 cards!

ANSWER MATRIX is prepared by teacher in two minutes. There is no pre-set pattern required by the system, which might restrict the test or give away clues to answers.

QUICK FEEDBACK

Student Response Cards are designed to "Tell-at-a-glance" how the whole class responded to each question, and where additional instruction is needed.

TEACHING TOOL

In addition to testing, the QRS Responder can be used for programmed instruction. The QRS Responder can be set to reveal the correct answer immediately after each response. Student can rapidly tally "self scoring" cards without grading tray or master card.

STORAGE AND CARRING BOX contains ten Q.R.S. responders. Weighs less than 5 lbs. Carton supplied without additional charge. One person can easily transport all materials for a class of 40 students. Permits sharing of the Quick Response System among four or five teachers.

SUGGESTED ORDER TO SERVE 30 STUDENT Classes		
30 QRS Responder boxes	\$ 8.75 ea.	\$262.50
2 Grading Trays	1.00 ea.	2.00
1 Box of 2,000 Cards (Style A or B)	20.00 box	20.00
2 Pkg. Master Answer Cards (Style A or B, 100/pkg.)	2.50 pkg.	5.00
Total		\$289.50

When shared among 5 teachers the investment is less than \$60. per classroom.* If each teacher gives 1 test per week the cost of cards is less than \$15 per year.

SUGGESTED ORDER FOR FOUR SETS of 30 Responders each (shared among 20 teachers)		
120 QRS Responder boxes	\$ 7.65 ea.	\$918.00
8 Grading Trays	1.00 ea.	8.00
2 Boxes of 2,000 style "A"	20.00 ea.	40.00
1 Box of 2,000 style "B"	20.00 ea.	20.00
3 Pkg. "A" Master Answer Cards	2.50 ea.	7.50
2 Pkg. "B" Master Answer Cards	2.50 ea.	5.00
Total		\$990.50

When shared among 20 teachers the investment is less than \$50.00 per classroom*.

* The QRS Responder has a life expectancy similar to a good textbook. If it is assumed to be three years the investment will be reduced to under \$20.00 per classroom.

QRS Quick Response System
Box 90, Falls Church, Va. 22046

EASY TESTING

The **QRS** system can be used with any existing multiple-choice test or can be prepared by the teacher. Questions can be oral, written, printed on test sheets, or projected on a screen.
